UPDATE on Honey...

I think we all remember the story about Honey, a young Pit Bull that came to HSP on December 31st with a rope embedded deeply in her neck and her head and neck hugely swollen. We named her "Honey" because she is so sweet, even after all she had been through. After surgery to remove the rope and close the wound, as well as a long treatment for a skin problem, Honey is now ready for her new home! Honey's story has been featured in the St. Pete Times and on Bay News 9. Please come in and meet our sweet girl today! It is the 1st day of the rest of her life!
